SUMMARY

Full stack developer with a degree in Systems Analysis and Development and experience in web development, process automation and systems integration. Most recently worked as a FAPESP research scholarship holder (TT-04) at IASense on IABug — a computer vision platform for detecting sugarcane pests — building the web dashboard and contributing to the API. Previous experience in RPA automation with Python and in supporting corporate systems and Business Intelligence.

EXPERIENCE

Full Stack Developer — FAPESP TT-04 Research Scholarship · IASense — Jan 2026 – Oct 2026

- Contributed to IABug, a platform that detects the sugarcane borer (*Diatraea saccharalis*) using computer vision (YOLO), made up of an image-upload app, an API and a web dashboard.
- Built the entire web dashboard in React and Tailwind CSS to manage farms, fields and traps, with an interactive map, infestation indicators and rankings, filterable reports and CSV export.
- Improved the system's API (Node.js and FastAPI), backed by MySQL.
- Redesigned and built IASense's corporate website in Webflow.

RPA Developer · Bild & Vitta Desenvolvimento Imobiliário — Oct 2024 – Jun 2025

- Developed Python and Selenium automations integrated with corporate web systems and REST APIs.
- Migrated legacy Blue Prism automations to Python, cutting execution time by 55.8%.
- Analyzed web system flows to extract, validate and persist data, taking business rules and backend integrations into account.
- Documented processes, integrations and data flows, working with cross-functional teams.

IT Analyst · Grupo Movimente — Nov 2020 – Dec 2023

- Supported and validated Business Intelligence dashboards, helping users interpret data.
- Helped define requirements and improvements for corporate web systems built in PHP.
- Wrote Python and VBA scripts to automate tasks, enter data into web systems and handle files.
- Identified bugs and bottlenecks in corporate systems together with the development teams.

PROJECTS

- **Jogoteca** — desktop app to organize a video game backlog, with kanban lists, ratings and reviews, and an IGDB/RAWG catalog. · C#, .NET 8, WPF, SQLite
- **CriptoPrice** — Chrome extension published on the Chrome Web Store showing real-time BTC and ETH prices in USD/BRL from the CoinGecko API. · JavaScript, Manifest V3
- **Personal portfolio** — website with projects and résumé, automatically deployed to GitHub Pages with GitHub Actions. · React, TypeScript, Vite, Tailwind CSS

SKILLS

Languages: Python, JavaScript, TypeScript, C#, PHP, SQL
Front-end: React, Tailwind CSS, HTML, CSS
Back-end: Node.js, FastAPI, Laravel, .NET, REST APIs
Databases: MySQL, PostgreSQL, SQLite
Automation: Selenium, Blue Prism, VBA
Tools: Git, GitHub Actions, Docker, AWS, Webflow
Practices: OOP, SOLID

EDUCATION

Technologist degree in Systems Analysis and Development · Universidade Moura Lacerda — 2021

LANGUAGES

Portuguese — native · English — intermediate (B2)
